

Researchers at Iowa Communication, Memory, and Mind lab (ICOMM) in the Department of Communication Sciences and Disorders at the University of Iowa are looking for participants for a research study. The purpose of this study is to better understand the relationship between memory and social language.

- **Participants invited: Adults who have a diagnosis of Stuttering**
- **Eligibility: All participants should be** native speakers of English. Participants should be between 18-50 years old.
- **Study participation involves:**
  - 1 study session, in which you will complete some conversation and/or description tasks, as well as short tasks involving attention, memory, and speaking.
  - Each session will last about 1-2 hours.
  - Sessions will be completed online using a video communication platform

We are happy to discuss any further questions or concerns that you may have about the study. For further information or to participate, please contact the Communication, Mind, and Memory Lab at
