

**Title:** The Role of Support Groups in the Attainment and Longevity of Treatment Goals in the Speech Disorder Stuttering: a Survey Study.

**Aim & Rationale:** The purpose of this study is to investigate the perceived benefits of support group involvement for Adults Who Stutter (AWS). Specifically, this survey measures in how far active involvement in a support group influences knowledge on stuttering, therapeutic goals and outcome in the areas of: speech, attitudes/feelings, environment & activity/participation.

**Primary Investigator & Institutional Affiliation:**

Julia Unger, Ph.D., CCC-SLP
