

## **Stuttering Treatment Experiences, Perceptions, and Willingness to Seek Future Treatment**

### **Primary Researcher**

Jaclyn Lucey M.A. CCC-SLP; Ph.D. student

Communication Sciences and Disorders at the University of South Florida

[jlucey1@usf.edu](mailto:jlucey1@usf.edu)

Researchers are seeking participants for a study about experiences in stuttering treatment and perceptions of stuttering treatment. Eligible participants are adults (age 18+) who stutter who have attended stuttering treatment/speech therapy.

As a participant, you will complete a short survey and a 60- to 90-minute interview. Interviews will be audio recorded and take place at USF or a location of your choosing. The study visit will last for approximately 2 hours.

## Recruitment Email for SLPs

Dear [*insert name*],

My name is Jaclyn Lucey M.A. CCC-SLP and I am a Ph.D. student from the Communication Sciences and Disorders at the University of South Florida. I am writing to you because you are a speech-language pathologist and I am looking to recruit participants for my research study about experiences in stuttering treatment and perceptions of stuttering treatment. Eligible participants are adults who stutter who have attended stuttering treatment/speech therapy at some point in time.

As indicated on the attached flyer, participants would complete a short survey and an interview. Interviews will be audio recorded and take place at USF or a location of their choosing. The study visit will last for approximately 2 hours.

If you think you know any individuals who may be interested in participating, I would greatly appreciate you sharing the attached flyer and/or my information. Of course, remind any individuals that this is completely voluntary, and they can choose to be in the study or not. If you have any questions about the study, please email me at [jlucey1@usf.edu](mailto:jlucey1@usf.edu).

Thank you very much.

Sincerely,

# Interview-Based Research Study for Adults who Stutter

USF IRB: 00039670

**Seeking adults who stutter to describe their experiences in stuttering treatment and perceptions of stuttering treatment.**

As a participant, you would complete a survey and an interview. Interviews will be audio recorded and take place at USF or a location of your choosing. The study visit will last for approximately 2 hours.

**Looking for participants who:**

Have a diagnosis of stuttering

Are 18 years of age or older

Have attended treatment/speech therapy for stuttering
