Participants Wanted for a Research Study

Title: Impact of Stuttering on Women Who Stutter in Their Young Adulthood

This study will investigate the life experiences of women who stutter. The purpose of this study is to achieve a better understanding of the impact of stuttering on women who stutter in different life domains in their young adulthood.

Who is illegible?

1. Women who stutter.
2. Age above 18.

What will you be asked to do?

You will take part in an interview for about 45 minutes.

If you are interested, you will also complete a questionnaire "Overall Assessment of the Speaker's Experience of Stuttering (OASES)" (Yaruss & Quesal, 2010) to generate a score for the impact of stuttering on different areas of life, which will take about 10-15 minutes.

If you have any questions or are interested in participating, please
